STERINOKS

About Us

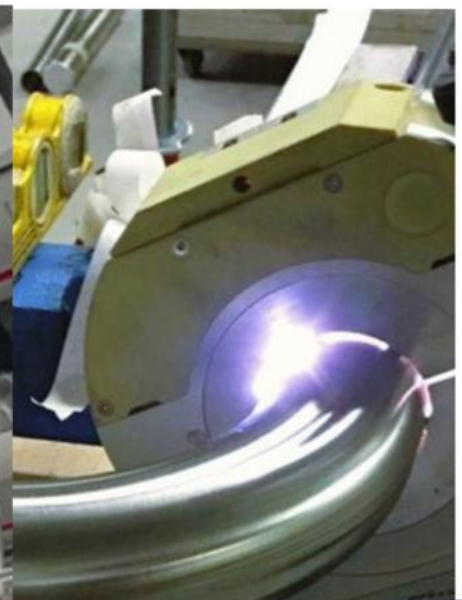

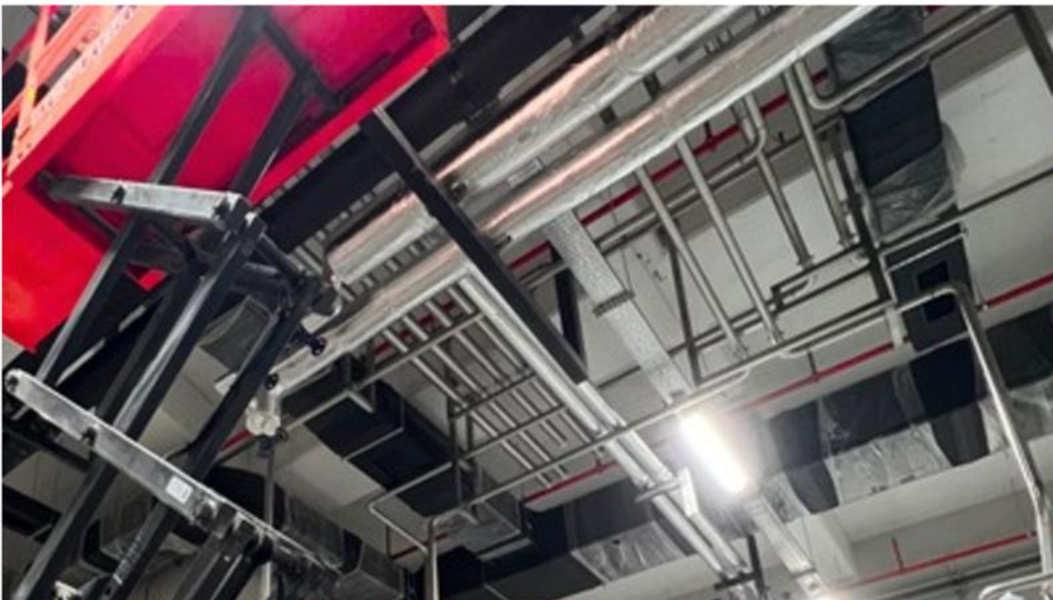

Our company, established in Çerkezköy, Tekirdağ/TURKIYE has managed to carry out its commercial activities in the field of manufacturing and as of 2023, it has updated its activity subjects on tank manufacturing and hygienic stainless steels in order to gain brand value with more than 17 km of installation welding assembly and equipment manufacturing in hundreds of projects and has taken its place in the domestic and international markets by taking the name of STERINOKS Engineering Stainless Machinery Trade. LTD. ŞTİ. Pharmaceutical, food, chemical companies: In stainless steel manufacturing in accordance with GMP standards, With its professional staff in its work considering CCS risks, It aims to add value to our country by providing superior services to manufacturing companies in welding applications that require expert engineering and superior talent.

Tekirdağ, Çerkezköy'de kurulan firmamız, imalat alanındaki ticari faaliyetlerini başarıyla sürdürmüş ve 2023 yılı itibariyle yüzlerce projede 17 km'den fazla tesisat kaynak montajı ve ekipman imalatı ile marka değeri kazanarak faaliyet alanlarını tank imalatı ve hijyenik paslanmaz çelikler olarak güncelleyerek, STERINOKS Mühendislik Paslanmaz Makine Ticaret LTD. ŞTİ. adıyla yurt içi ve yurt dışı pazarlarda yerini almıştır. İlaç, gıda, kimya firmalarına GMP standartlarına uygun paslanmaz çelik imalatında, CCS risklerini dikkate alan profesyonel kadrosuyla, Uzman mühendislik ve üstün yetenek gerektiren kaynak uygulamalarında imalat firmalarına üstün hizmetler sunarak ülkemize değer katmayı hedeflemektedir.

Sterile Inox Plumbing Projects

We complete the project design and installation of all installations within the scope of the project, from under-machine steam installations to condensate and water systems in new facility installations and revisions, from production area manufacturing installations to drains, with gaseous and orbital welding methods, and offer packaged sterile line solutions with passivation tests.

Temiz Paslanmaz Tesisat Projeleri

Proje kapsamındaki tüm tesisatların tasarım ve kurulumunu, makine altı buhar tesisatlarından, yeni tesis kurulumlarında ve revizyonlarında kondens ve su sistemlerine, üretim alanı imalat tesisatlarından drenajlara kadar, gazlı ve orbital kaynak yöntemleriyle tamamlıyoruz ve pasivasyon testleri içeren paketlenmiş steril hat çözümleri sunuyoruz.

Tank Manufacturing and On-Site Installation

We provide services to our solution partners for the installation of new facilities, the manufacturing of filtration, settling and pressure tanks, heavy manhole cover revisions of existing tanks, stainless platforms and safe intervention walkways, OHS-compliant manufacturing of slippery stairs, steps and platform tops, and the installation of all tank installations.

316L HYGIENIC TANKS, CERTIFIED ACCORDING TO TECHNICAL SPECIFICATIONS, CAN BE PRODUCED ACCORDING TO THE CERTIFICATES YOU SPECIFY AND ARE SUITABLE FOR EXPORT.

Tank Üretimi ve Yerinde Kurulum

Çözüm ortaklarımıza yeni tesislerin kurulumu, filtrasyon, çöktürme ve basınç tanklarının imalatı, mevcut tankların ağır menhol kapaklarının revizyonu, paslanmaz çelik platformlar ve güvenli müdahale yolları, iş sağlığı ve güvenliği standartlarına uygun imalatı kaygan zemin merdivenleri, basamaklar ve platform üstlerinin ve tüm tank kurulumlarının montajı konularında hizmet vermekteyiz.

316 L HİJYENİK TANKLAR, TEKNİK ÖZELLİKLERE UYGUN OLARAK SERTİFİKALANDIRILMIŞTIR, BELİRTTİĞİNİZ SERTİFİKALARA GÖRE ÜRETİLEBİLİR VE İHRACATA UYGUNDUR.

TURN TABLE

TT100 Turntable

These high-precision, anti-jamming machines, made entirely of stainless steel and compliant with occupational health and safety standards, are designed to prevent even the smallest bottles from tipping over and feature a linear guide rail unit for manual plastic tray loading and calibration. All components, except the motor/gearbox and drive, are manufactured and designed by Sterinoks.

Technical Details

- ***All certified stainless steel***
- ***Hygienic, GMP and CCS compliant***
- ***Suitable for export***
- ***Suitable for certification***
- ***No routine maintenance required, maintenance is covered for 2 years***
- ***Speed adjustable and compatible with PLC control***
- ***Machine height adjustable***
- ***Input/Output Feeding/Loading are design-specific***

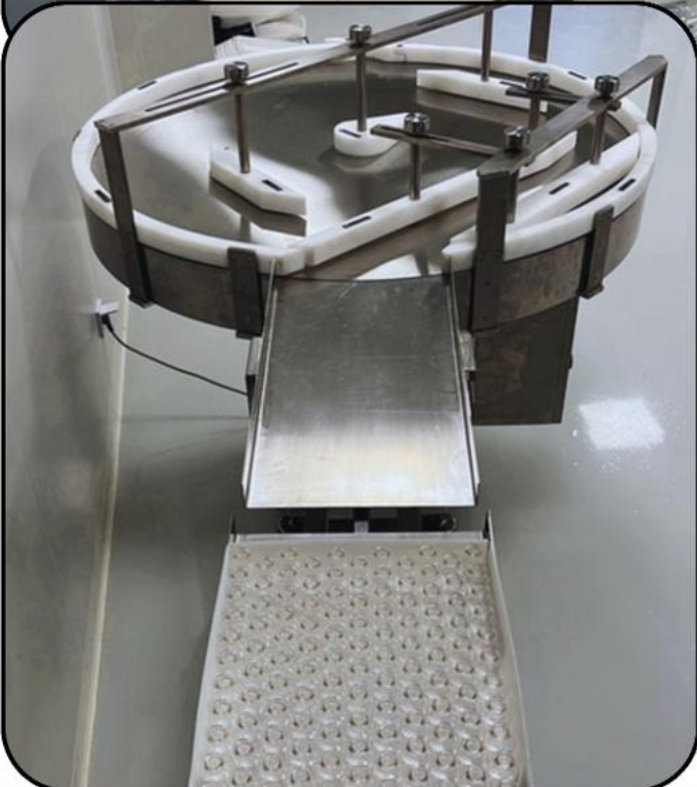

DÖNER TABLA

TT100 Turntable

Tamamı paslanmaz çelikten yapılmış, yüksek hassasiyetli, sıkışmaya dayanıklı ve ISG uyumlu makineler olup, en küçük şişelerin bile devrilmesini önleyici yapıdadır ve manuel plastik tepsi yükleme ve kalibrasyon için doğrusal bir kılavuz ray ünitesine sahiptir. Motor/redüktör ve sürücü hariç tüm bileşenler Sterinoks tarafından üretilmiş ve tasarlanmıştır.

Teknik Özellikler

- Tamamı sertifikalı paslanmazdır
- Hijyenik, GMP ve CCS uyumlu
- İhracat için uygun
- Sertifikasyon için uygun
- Rutin bakım gerektirmez, bakım 2 yıl garantilidir
- Hız ayarlanabilir ve PLC kontrolü ile uyumludur
- Makine yüksekliği ayarlanabilir
- Giriş/Çıkış Besleme/Yükleme tasarıma özeldir

IBC Tanks

Technical Details

- **Certified 316L Stainless Steel**
- **0.2 micron surface precision**
- **Optional special design**
- **Discharge chamber with lever-operated valve and certified EPDM seal**
- **No risk of contamination**
- **All welds are argon gas and robotically welded**
- **Quality controls are in compliance**
- **Manhole covers can be produced in custom sizes**
- **Suitable for export**
- **All qualifications and certificates are available**
- **Suitable for production with agitators**
- **Suitable for food, pharmaceutical, chemical, cosmetic, dairy, petrochemical plants, etc.**

IBC Tanklar

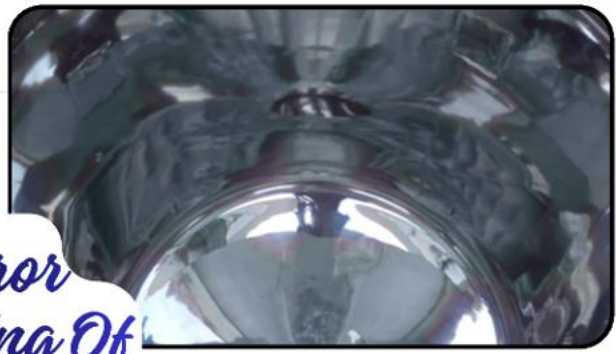

Teknik Özellikler

- **Sertifikalı 316L Paslanmaz Çelik**
- **0,2 mikron yüzey hassasiyeti**
- **Opsiyonel özel tasarım**
- **Kol kumandalı vanalı ve sertifikalı EPDM contalı boşaltma haznesi**
- **Kirlenme riski yok**
- **Tüm kaynaklar argon gazı ve robotik kaynak ile yapılmıştır**
- **Kalite kontrolleri uyumludur**
- **Menhol kapakları özel boyutlarda üretilebilir**
- **İhracat için uygundur**
- **Tüm yeterlilikler ve sertifikaları mevcuttur**
- **Karıştırıcılarla üretim için uygundur**
- **Gıda, ilaç, kimya, kozmetik, süt ürünleri, petrokimya tesisleri vb. için uygundur**

Mirror Polishing and Satin

Before

After

Mirror Polishing Of The Product Tank Interior Surface

Tanks develop surface roughness due to intensive chemical raw material use, impacts, falls, etc. These are conditions that cannot be removed by chemical cleaning. Polishing maintenance is required. With flawless surface polishing, we achieve a mirror-like surface appearance and bring the surface smoothness to a perfect state. We perform flawless internal and external polishing processes on everything from the smallest mobile tanks and sample transport containers (trommels) to large tonnage capacity storage and production tanks.

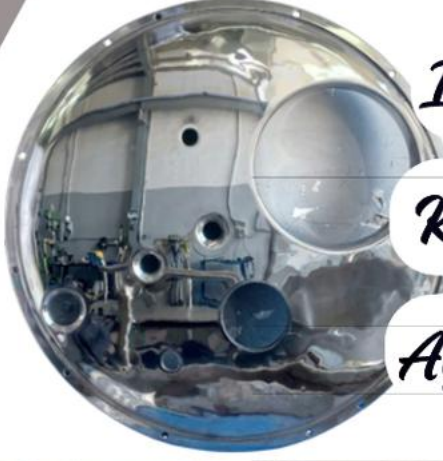

Product Scrapped By Pharmaceutical Company

Kapak
Ayna Polisajı*

*Reaktör Tankı
Dış Satine*

Yoğun kimyasal hammadde kullanımı, darbeler, düşmeler vb. nedenlerle tankların yüzeyinde pürüzlülük oluşur. Bu durumlar kimyasal temizlikle giderilemez. Parlatma bakımı gereklidir. Kusursuz yüzey parlatma ile ayna gibi bir yüzey görünümü elde eder ve yüzey pürüzsüzlüğünü mükemmel bir duruma getiririz. En küçük mobil tanklardan ve numune taşıma kaplarından (trommel) büyük tonaj kapasiteli depolama ve üretim tanklarına kadar her şeyde kusursuz iç ve dış parlatma işlemleri gerçekleştiriyoruz.

Sterile Area Hygienic Equipment Manufacturing

Temiz Alan Hijyenik Malzeme Üretimi

We are a solution partner in the manufacturing of housing filters with desired specifications, barrel containers with special lids (handled and lockable), fixed or portable sampling containers, stainless steel sieves according to desired diameter measurements, manhole covers specific to temperature and pressure values for tanks, and certified connection equipment.

İstenilen özelliklerde housing filtre imalatı, özel kapaklı (kulplu ve kilitli) varil konteynerler, sabit veya taşınabilir numune alma kapları, istenilen çap ölçülerine göre paslanmaz çelik elekler, tank için sıcaklık ve basınç değerlerine özel menhol kapakları, sertifikalı bağlantı ekipmanlarının imalatı alanlarında çözüm ortağıyız.

SAĞLIĞA DEĞER KATIYORUZ

planning.**

+90 507 123 2345

Sterile Field Equipment

Roller Heavy Load Area Transition Conveyor

Code: #RL.HL.101

DESCRIPTION

Specially designed conveyors made entirely of stainless steel, which enable the heavy pallets of bottles in the loading area to be transferred to the production area via door passes on plastic pallets.

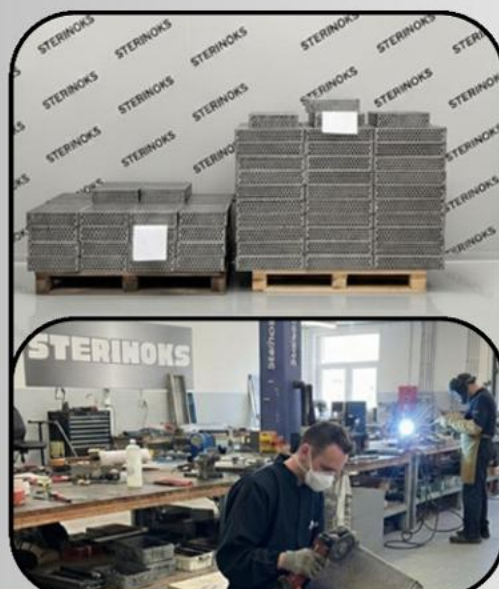

Autoclave Tray

Code: #STR.OTT.01

DESCRIPTION

316L certified stainless steel autoclave trays are resistant to high temperatures and pressures thanks to special manufacturing methods. They can be custom-made with fixed or movable lids for practical filling/emptying.

Stainless Steel Leakproof Screen Panel

Code: #WP.SP.01

DESCRIPTION

Application of leak-proof or hygienic stainless steel casing panels tailored to the dimensions of devices such as monitoring screens and lighthouse particle devices used in hygienic areas.

Sterile Field Equipment

Transportation, Installation, Hygienic Piping

Code: #HJ.ORB.10

DESCRIPTION

The machines are transported using air cushions that do not damage the epoxy, the machines are installed, and the hygienic pipe systems for the machines are provided with welded assembly (all welds are hygienic gas welding inside the pipes).

Hygienic Stainless Steel Clamp-Connector

Code: #CL.1001

DESCRIPTION

Special manufacturing of hygienic reduction fittings, tee fittings, and machine connection parts created with clamp connections. Supply of internationally certified 316L stainless steel or ASME standard stainless steels, as well as EPDM and NSF approved clamp mounting adapters with gaskets.

Non-sterile Panel- Twin-screw Pumps and Installations

Code: TWN.02

DESCRIPTION

Hygienic installations and welding applications, assembly of twin-screw pumps with external connections from inside the machine, development and adaptation of powder supply systems.

Sterile Field Equipment

Electric Cable Tray with Practical On/Off (Snap-on) Mechanism

Code: #STR.TAV.4

DESCRIPTION

The Sterinoks cable tray is made entirely of stainless steel and features a special bending design that makes it easy to open and close.

With its particle-proof covers for electrical cables in both sterile and non-sterile areas, it is the choice of perfectionists both visually and functionally.

Autoclave Trolley Locking Brake System

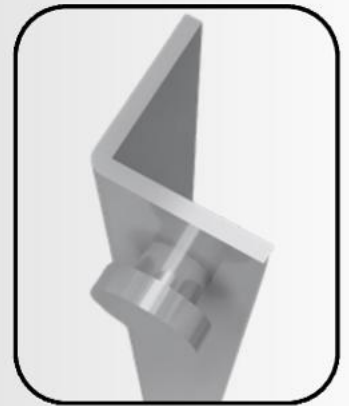

Code: #OTK.01

DESCRIPTION

Engineering solutions for autoclave trolley revisions and braking systems, featuring a break-resistant design and three-point locking with a single lever. Discover our autoclave trolley revisions that offer up to 80% longer lifespan and up to 5 times higher efficiency in safe transport.

Autoclave Pinned Thick Shelf

Code: #OTK.02

DESCRIPTION

Increase your productivity with our 316L self-pinning, mirror-polished racks in 30x30x2 and 30x30x3 sizes, offering greater durability and a surface precision of less than 0.2 microns inside the autoclave.

Sterile Field Equipment

Non-Sterile Area Non-Slip Ladder

Code: #STR.BS.01

DESCRIPTION

We manufacture sterile area ladders with non-slip steps, in both movable and fixed types, including stainless steel wheels. They are custom-made to the required dimensions.

Jumping Bench & Bone-Shoe Cover- Mask Cabinet

Code: #STR.BS.02

DESCRIPTION

Manufacturing of glossy surface jump counters and hairnet storage cabinets used at hygiene area transition points, which can optionally be designed with six shoe racks.

Manufacturing of Locked Fumigation Tanks

Code: #STR.KZN03

DESCRIPTION

We offer stainless steel, wheeled and lockable revisions for the lower chambers of chemically deformed fumigators. We extend the lifespan of your worn-out equipment.

Sterile Field Equipment

Custom Design Reduction Manufacturing

Code: #HJ.RED.02

DESCRIPTION

Experience our hygienic equipment in your own revisions with our custom-made clamp-connector reduction fittings for use in filling machines and production lines where the diameter needs to be increased.

Twinscrew Pump for Precision Surface Polishing

Code: #TWN.PLS.01

DESCRIPTION

You can choose our effective solutions for filling deformations on the surfaces of twin-screw pumps and performing precision polishing, and you can contact us to implement our correct engineering solutions for the transfer of high-viscosity products.

Infrastructure Pumping, Plumbing, Welding and Tanks

Code: #YI.KYN.02

DESCRIPTION

We look forward to being your solution partner in the revision and maintenance of pumps located in water systems and booster pump rooms of infrastructure facilities, the installation of new pumps, their piping, welded assembly projects, and the repair and manufacturing of new tanks for auxiliary facilities.

Sterile Field Equipment

Panel Protective Barriers

Code: #SS.BRY.01

DESCRIPTION

Made from 304 SS steel, these impact-resistant barrier systems ensure your panels have a longer lifespan. The barriers prevent scratches on the panel surface caused by pallet trucks and friction.

Panel Protective Sheets

Code: #SS.BRY.02

DESCRIPTION

Our 304 SS quality steel barrier system, used to protect panels against impacts, allows you to protect your facility's panels with a more elegant look while also achieving an aesthetically pleasing appearance.

Buffer Tank Product Bar

Code: #HJ.UC.01

DESCRIPTION

We manufacture ASME-certified, welded, and polished product bars for buffer tanks and similar manifold connection systems. We produce clamp-connected parts of various diameters with excellent surface quality, ensuring product transfer through them, and adding value to health and safety with our high GMP standards.

Sterile Field Equipment

Sealed Glass Protective Case for Particle and Laminar Flow Device

Code: #STR.KL06

DESCRIPTION

Sterinoks device covers enclose the small screens of Lighthouse particle measuring devices and HEPA filter laminar flowmeters located in your sterile area. The devices, cut off from the external environment, are protected against impacts and provided a leak-proof seal.

Sampling and Drum Containers

Code: #HJ.DRM.02

DESCRIPTION

For your orders of drum containers and sample containers with handles, locks, levers, and in your desired capacities, you will also benefit from our 3D modeling and presentation services. You can verify the accuracy of your requested product through a solid model and reflect your expertise in the design.

Stainless Steel Installation from Technical Area to Room Interior

Code: #HJ.KT.10

DESCRIPTION

You can choose our project, which involves designing and implementing welded installations for the exit of compressed air, water, nitrogen, and data pipelines from inside the room to the technical area (ceiling). With our professional solutions and time-saving proposals, your spaces will be more modern and more hygienic.

Sterile Field Equipment

Machine Panel Opening Sheet Metal Closure

Code: #STR.SC.01

DESCRIPTION

In facilities where field installations are ongoing, we offer solutions for sealing the gaps between machinery and panels with stainless steel. Experience our solutions for sealing gaps in technical area passages and under machinery during machine transportation, on-site installation, and panel assembly.

Housing Systems

Code: #HS.LIQ.01

DESCRIPTION

Manufacturing of filter housings and installation of all chamber downpipe and clamp-welded connection systems. Achieve lasting solutions for your facility by choosing Sterinoks Engineering's quality, which manufactures air-nitrogen and liquid system housing filters from scratch.

Granulation Filter Mesh Connections

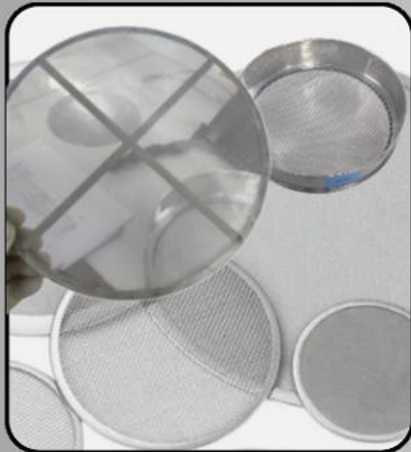

Code: #HJ.FGL.01

DESCRIPTION

Manufacturing of parts and/or complete mechanisms used as filter mounting devices in systems such as Solid FGL. Experience our affordable solutions for robust, reliable, long-lasting equipment and spare parts for similar systems used in granulation machines.

Sterile Field Equipment

Hygienic Sieves (Mesh Systems)

Code: #HJ.MSH.016

DESCRIPTION

Sterinoks manufactures meshes ranging from 10 to 2000 microns, with specially soldered edges and low-value, medium-strength reinforcement for high durability, in the desired diameter and specifications. In the industry, **Sterinoks** offers solutions to machine manufacturers and engineers requesting meshes with precision equipment that has received high-quality approval.

Sink Gooseneck and Stainless Steel Sink Drains

Code: #PW.PLS.01

DESCRIPTION

By considering our solutions for installing hygienic valves and taps in the pipework of washbasin areas and converting plastic drains under the sinks to stainless steel, you can increase the quality and lifespan of your washrooms and the plumbing used for chemical waste disposal.

Certified Stainless Steel Fire Cabinet Manufacturing

Code: #SS.D.Y.01

DESCRIPTION

With the Sterinoks Stainless Steel Fire Cabinet, which has all certification documents including TSE, features a retractable hose and tube system, is sealed all around and is invisible from the outside (including hinge points), and can be installed in the walls before sterile areas with built-in cabinets, ensuring both safety and an aesthetic appearance.

CONVEYOR SYSTEMS

Contact us to make your projects unique

+90 05071232345

Conveyor Equipment

PVC BELT CONVEYOR

Code: #PCC10

DESCRIPTION

Make a difference in your facility with conveyors from STERINOKS, the only company in Turkey that manufactures stainless steel chassis conveyors with PVC belts at sigma profile prices. Choose our expert solutions that ensure long-lasting chassis and hygienic belts at the end of your machines and production lines.

VIAL CARRYING PRECISION CONVEYOR

Code: #MS100P

DESCRIPTION

Our specialized conveyor solutions are used at both in-machine and off-machine feeding points, transferring vials without vibration or tipping issues. You can experience our loading tray applications at the exit point, which you can use at line and machine exits. Vial conveyors are also used synchronously in our turntable applications

CHAIN DRIVEN ROLLER CONVEYOR

Code: #RL121

DESCRIPTION

These are single-point driven roller conveyors with plastic and metal gear options, used for heavy-duty transport. Experience our unparalleled quality with high-capacity transport capabilities, low maintenance costs, and occupational safety and health compliance for your palletized and boxed products

Conveyor Equipment

BOTTLE TRANSPORT CONVEYOR

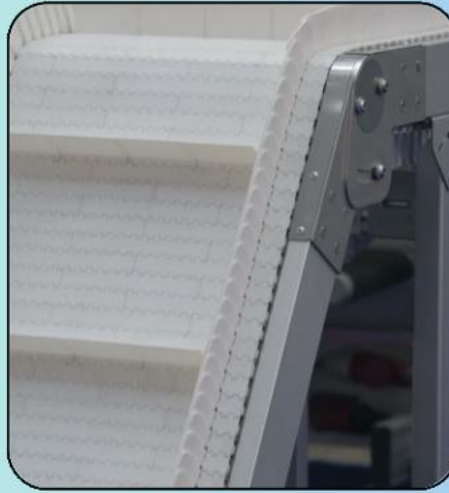

Code: #TC100

DESCRIPTION

Our specially developed certified modular belts, with their high water resistance and low elongation coefficient, are top-quality, price-performance products featuring a washable, food-contact-safe, stainless steel conveyor frame. Join our solution partners who experience our quality in modular belt applications in plant line installations.

info@sterinoks.com

ELEVATOR CONVEYOR

Code: #ELV001

DESCRIPTION

Keep your production lines safe with our stainless steel conveyor solutions featuring PVC and modular belts, equipped with carrier pallets, for reaching high points in product transfer. Experience our permanent services with fixed, wheeled, adjustable tilt angles and machine synchronization via automation.

STERILE PRODUCT TRANSPORT CONVEYOR

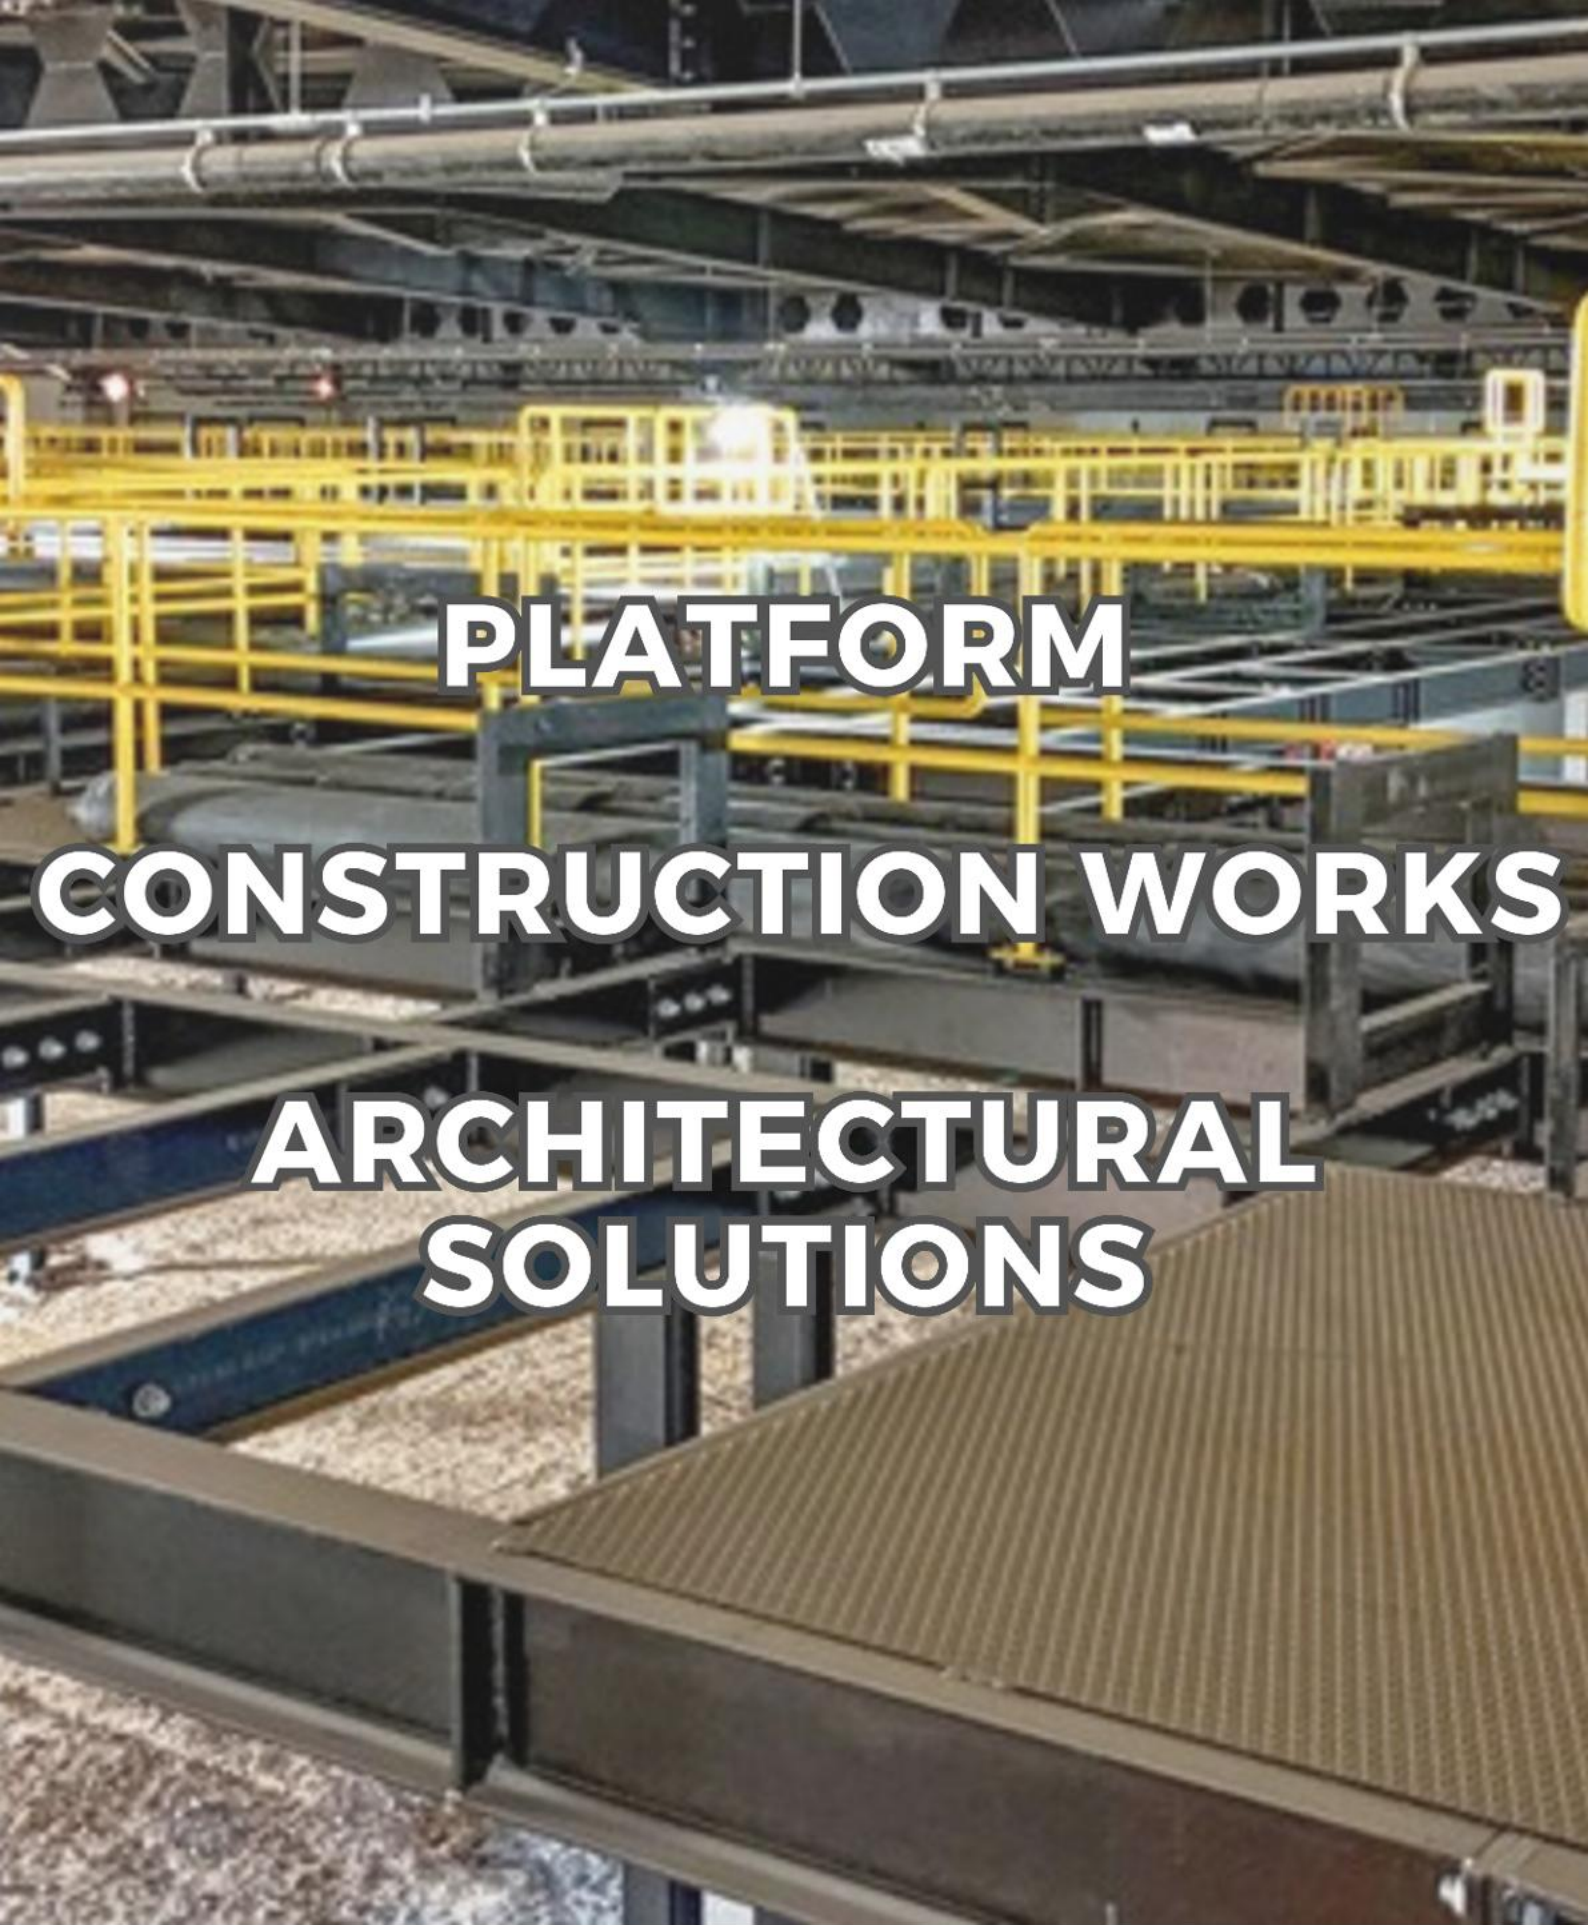

Code: #SPC001

DESCRIPTION

FDA-approved, alcohol-resistant, all-stainless steel, and certified conveyor systems suitable for sterile areas and production lines. Join those who choose Sterinoks GMP quality for sterile area conveyor systems for product handling at transition points and under passboxes.

Page 20

STERINOKS

PLATFORM CONSTRUCTION WORKS ARCHITECTURAL SOLUTIONS

Contact us to make your projects unique

[+90 05071232345](tel:+9005071232345)

Platform, Construction Works, Architectural Solutions

Platform and Mezzanine

Code: #PS100

DESCRIPTION

Our elevated walkways, featuring friction-resistant steps that comply with occupational safety standards, allow you to either secure access points for your machinery or enhance your quality and added value by opting for platforms that provide easy access to the highest points of your tanks.

CONSTRUCTION WORKS

Code: #MTC100

DESCRIPTION

Machinery relocation, facility construction, panel and steel works, roofing and facade applications. With our expert team, we offer effective solutions for all the necessary applications for your facility.

Architectural Solutions

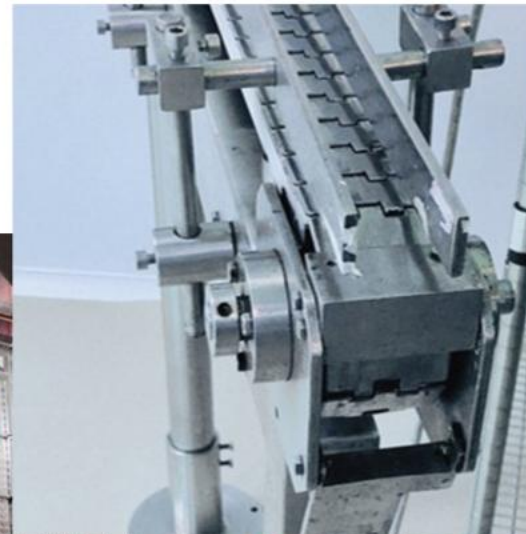

Code: #PTC2100

DESCRIPTION

Thanks to our innovative solutions for architectural projects, you can achieve aesthetically pleasing and durable structures that create lasting visual works. Our architects create unique results with custom designs tailored to your projects.
